## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see p. 2-4, filed 8/20/2010, with respect to claims 1-7 and 13 have been fully considered and are persuasive. Applicant argues that unexpected results were obtained, such as in Example 4 of the present invention wherein low color irregularities are achieved due to the specific temperatures chosen for the first and second swelling baths. These results were not obtained for comparative examples 4 or 7. The Examiner agrees. Kameyama discloses that dyeing unevenness (i.e. color irregularities) may be reduced by lowering the stretch ratio of the bath [0053] and Sugino discloses that the stretch ratio may be adjusted by adjusting bath temperature [0047]. However, the present invention achieves low color irregularities without changing the stretch ratio. The stretch ratio is the same for Example 4 of the present invention and comparative examples 4 and 7, but low color irregularities are achieved only in Example 4 of the present invention based on choosing specific temperatures for the first and second swelling baths. Therefore, the results of the present invention were unexpected from the teachings of Kameyama and Sugino, which disclose setting the bath temperature to lower the stretch ratio, thereby reducing dyeing unevenness. The rejection of claims 1-7 and 13 has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 1-7 and 13 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art does not reasonably suggest or disclose fabricating a polarizing film by uniaxially

Art Unit: 1715

stretching a resin film comprising the steps of immersing the resin film in bath liquids in at least two or more swelling baths in sequence in the swelling step, wherein the bath temperature of a swelling bath in a Nth position is set at a temperature at least 3°C higher than a swelling bath in a (N+M)th position (N and M are positive integers). The use of two or more swelling baths having the specified bath temperatures has the advantage of reducing color irregularities in the film.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### **EXAMINER'S AMENDMENT**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bernadette McGann on 9/15/2010.

The application has been amended as follows:

Please cancel claims 8-12.
